### INTRO

Dust Science is very proud to announce that Sheffield electronic pioneer and originator Richard H. Kirk has joined Dust for a one off project called **Fear (No Evil)**. Breaking off from working on his own Intone projects to supply Dust with 4 tracks for the **Fear (No Evil) EP**. **Toned** is a classic dirty 8-bit bleep anthem, the funky and fucked-up bits and bytes fight for the piece of your mind that makes you want to dance. **Casa nc dada** provides voodoo beats for the future, a completely different take on what you believe to be Mambo. **Fear (No Evil)**, mashes Dub, Counter-Point rhythms and vocal snatches together to bring a track with real soul and emotion. And finally, **Bn2** is just classic Kirk, bleeps, cut-ups and bass with orchestral stabs through your disco heart! South Yorkshire Mind Violence at its very best...
